

THIS IS MY ISAGENIX STORY

Having tried most diets and diet plans that have been around for the past 20 years, I was really beginning to think NOTHING was going to work for me. I must admit that the Low Carb diet had been one of the better ones – however, did I have to eat low carbs all my life ?

Always looking for a solution, I happened to come across a booth at a Health Show. While I was reading the material, the girl who was supposed to be manning the booth next door said, “**This is my 7th day and I can tell you that product really works**” ! Interesting, I thought.

Nevertheless, I went home and researched the company on-line. Impressed by what I saw on the Isagenix website, I returned to the Health Show later that night and ordered my first product.

Nine days later - 10 and ¾ inches and 10 pounds less - I discovered I had not only lost weight and inches, but I experienced some major physical benefits as well - and felt absolutely wonderful. After significant lower backache on days 3,4,and 5, I passed gravel in my urine several times and then my back pain disappeared. My hot flashes disappeared within just a few days of being on the product. That was amazing. My cravings for sweets and carbs was gone and I actually felt like getting up in the morning. I had lots of energy to last through the day.

While I still have more weight to lose, I now see an end in sight and I don't ever want to be without Isagenix !
